

Sonu Kumar Kapar

Senior Software Developer

✉ sonkum8640@gmail.com | ☎ +91-9899237236 | 💻 sk0611 | 🌐 sonu-stackmaster | 🌐 Portfolio

Summary

Senior Full Stack Developer with 4+ years of experience designing and delivering scalable cloud-native and AI-powered applications. Proven track record of building production systems end-to-end, optimizing performance and infrastructure costs, and deploying LLM-based solutions at scale. Experienced in collaborating with clients and stakeholders to translate business needs into technical solutions, contributing to the successful delivery of 20+ projects.

Technical Skills

- **Frontend:** React, Next.js, JavaScript (ES6+), TypeScript
- **Backend:** Node.js, Express.js, NestJS, Django/FastAPI, GraphQL
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis, Prisma/Drizzle (ORMs), Elasticsearch
- **Cloud/DevOps:** AWS (Lambda, S3, EC2), Docker, Jenkins, CI/CD, Google Cloud (GCP)
- **AI/ML:** OpenAI, Anthropic, LangChain, LangGraph, Pinecone/Weaviate, Hugging Face
- **Automation:** n8n, Zapier, Make
- **Other:** Twilio, WebRTC, Socket.IO, Microservices, Agile/Scrum, MCP Servers

Professional Experience

Senior Consultant Development

Mar 2023 – Present

Oodles Technologies, Gurugram

- Led end-to-end architecture and delivery of scalable production systems serving 1M+ users, ensuring high performance and reliability.
- Mentored a team of junior engineers and drove technical decisions across backend, cloud infrastructure, and sprint execution.
- Built event-driven microservices using Node.js and AWS (Lambda, API Gateway, SQS), reducing infrastructure costs by 25% and improving system resilience.
- Optimized system performance through Redis caching, query tuning, and containerized deployments, reducing response time to under 200ms and deployment time by 40%.

Programming Lab Instructor

Feb 2021 – Feb 2022

Indian Institute of Computer Education, Delhi

- Conducted hands-on lab sessions on programming fundamentals, data structures, and algorithms using C++/Java/Python.
- Designed and evaluated coding assignments and projects, providing detailed feedback to improve code quality and problem-solving skills.
- Mentored 20–40 students per semester on debugging, best practices, and real-world application of programming concepts.
- Collaborated with faculty to enhance lab curriculum and align training with industry standards.

Projects

Future AGI (app.futureagi.com)

- Developed and enhanced **FutureAGI.com**, a scalable platform for interacting with AI-driven tools and insights.
- Engineered seamless integration of REST and GraphQL APIs, delivering AI-generated content to over 50,000 daily users; the integration streamlined content updates, reducing operational workload by 20 hours per week.
- Built reusable component libraries using Storybook and Appsmith, improving development speed and UI consistency.
- Contributed to product launch and performance optimization, driving improved user engagement.
- **Tech Stack:** Django, React.js, AWS, React Query, LLMs, Redis, PostgreSQL, HuggingFace, Quill, AG-Grid.

MicroGPT (*microgpt.io*)

- Built a multi-platform AI developer ecosystem, including VS Code, JetBrains, Chrome extensions, and a cloud-based Web IDE with real-time code assistance and summaries.
- Developed a Crypto Telegram Bot delivering real-time trading insights via blockchain API integrations.
- Designed an admin dashboard with analytics and usage insights to monitor platform performance and adoption.
- Implemented scalable serverless backend services using Python and AWS Lambda to support cross-platform integrations.
- **Tech Stack:** Python, TypeScript, AWS Lambda, GCP, Telegram Bot API, GitHub Automations.

AI Automation Solutions

- Developed AI-powered customer support agents using LangChain and OpenAI, enabling automated query resolution and improving response efficiency.
- Designed and deployed scalable real-time video calling infrastructure using WebRTC and Socket.IO.
- Built automation pipelines with n8n, Make, and Zapier, reducing manual operational effort by 50% and improving workflow reliability.
